Second sexual assault of year reported on Hobo Day

MAKENZIE HUBER
Editor-in-Chief

A sexual assault was reported from a female student at Hansen Hall at 3:39 a.m. Saturday morning. It is the second sexual assault reported at South Dakota State this semester.

The sexual assault is still being investigated by the University Police Department.

The student knew the name of the suspect. University police officers brought the suspect in for questions, but are now looking at a “different situation that has arisen,” said University Police Department Chief Tim Dunn.

A campus-wide email was not sent out to students containing a warning. The Jeane Cherry Act obligates SDSU and other universities to inform students of any crime that occurs on campus. According to Dunn, a campus-wide email was not sent because the crime was still under investigation. Once police officers “know exactly what actually happened,” an email would be sent to the student population if a sexual assault occurred, Hearon said.

There’s a lot of confusion about who had happened to Hearon. “It was reported as a sexual assault, but we’re still trying to prove what happened.”

UPD needs to gather information and answer any questions left about the incident.

SDSU goes through with tobacco-free campus policy

MAKENZIE HUBER
Editor-in-Chief

The South Dakota State University campus will become smoke-free and tobacco-free in the early 2016, but rejected a campus-wide email on Oct. 17 asked students about their views on it.

“Based on the comments received,” Chapman said. “That’s kind of how it’s always been. It’s a hidden problem facing South Dakota State and college campuses across the country. ‘I think it is a bigger problem than people realize,’ said Tracy Chapman, a counselor at SDSU and program coordinator at the Brookings Domestic Abuse Shelter.

‘Behind closed doors:’ controlling behaviors normalized in intimate college relationships

GARRETT AMMESMAKI
News Editor

Intimate partner violence is a hidden problem facing South Dakota State and college campuses across the country.

“I think it is a bigger problem than people realize,” said Tracy Chapman, a counselor at SDSU and program coordinator at the Brookings Domestic Abuse Shelter.

Abuse in relationships occurs most commonly between the ages of 18 and 29, putting college students in the middle of the demographic, while stereotypes and a lack of understanding allow it to continue.

“Domestic violence is seen as a middle-aged woman’s problem, specifically middle-aged women with young children,” Chapman said. “That’s kind of how it’s always existed in Hollywood. I think that sees our ideas about what it is, and traditionally I suppose that is domestic violence, but intimate partner violence becomes domestic violence.”

According to a 2010 poll commissioned by Break the Cycle, nearly half of student respondents across the country had a friend who suffered at least one form of abuse from their intimate partner, and a full half of respondents did not believe intimate partner violence was an existing problem on their campus.

Intimate partner violence can include separating the victim from friends and family or telling them what to wear, and can be seen as positive at first. Chapman might say “I don’t want you to hang out with your friends. I want you to hang out with me. I really care about you, really I want to spend time with you,” Chapman said. “And maybe that seems endearing and sweet at first. Oh he wants to spend time with me, he really cares about me so I’m not going to go hanging out with my friends.”

Though inter-partner abuse is reportedly happening against women, male college students also fall victim to controlling behaviors within relationships.

Senior exercise science major CJ Gray said he witnessed a “very close friend” experience controlling behaviors from a girlfriend. The friend would have to ask their significant other before being allowed to hang out with friends on multiple occasions.

“I’m usually in a negative connotation, where it happens on multiple occasions and you end up not seeing that friend as often,” Gray said.

$4 million donation to create new Native American center

IAN LACK
Reporter

South Dakota State University President Barry Dunn announced a $4.1 million plan to support the Wokini Initiative, a program focused on increasing enrollment of American Indian students.

A campus-wide email was not sent because the crime was still under investigation. Once police officers “know what actually happened,” an email would be sent to the student population if a sexual assault occurred, Hearon said.

There’s a lot of confusion about who had happened to Hearon. “It was reported as a sexual assault, but we’re still trying to prove what happened.”

UPD needs to gather information and answer any questions left about the incident.

The tentative location for the new student center is on the Roodena Green, at the south edge of campus near Eighth Street and Campusi- le Avenue. A final location will be determined pending approval from the South Dakota Legislature.

Scholarships for Native American students will be distributed from the Office of Financial Aid. Dunn said the university will work to ensure these scholarships are continued in the future, which he likely consider of $5,000,000 per year for qualified students.

BYRON NOEL, SDSU Instructor

Noel’s course teaches students how to operate drones to whatever field you’re in now, it’s a skill that a lot of students will become much more prominent. It’s a tool that a lot of students might have to have,” Noel said. “This is a tool that absolutely will become much more prominent in the next few years and it’s a skill that a lot of students might have to have.”

Noel said that he wants students to know whatever field you’re in, to add to your resume and your employability.”

Noel’s course teaches students how to operate drones with safety, simulation, flying and piloting experience.

The course also prepares students to pass the 107 small UAS commercial pilot test through the Federal Aviation Agency, essentially a driver’s license for unmanned aerial systems. Noel was one of the first people in the state to receive a 107 license.

“IT’S A TOOL THAT ABSOLUTELY WILL BECOME MUCH MORE PROMINENT IN THE NEXT FEW YEARS AND IT’S A SKILL THAT A LOT OF STUDENTS MIGHT HAVE TO HAVE.”

SDSU instructor Byron Noel’s introduction to small aircraft systems class, one of the classes required by the certifier, co-created the program with Bob Watrel, interim head of the Departments of Geography.

“The program’s purpose is to get [students] ready for whatever career they’re in already, Watrel said. Some of the biggest challenges to getting the program off the ground was paperwork and perhaps take part in a drone race on campus.

In addition to Noel’s class, two other courses are required for the program: aviation safety and aerial remote sensing, with a four class as an elective.

Getting the program off the ground took a lot of work, Watrel said. Some of the biggest challenges to getting the program started included liability for the safe use of the drones and government policy, but all of this fell into place last year, he said.

“It’s difficult with something like this technology is so cutting-edge. It’s still being updated,” Watrel said.

Once the university approved the program, the proposal went to the South Dakota Board of Regents where it was also approved. A $12,000 grant through the Office of Provost Dennis Hedge provided the drones used by the program as well as the software needed to train students to use them.

The program will not only be included in the certificate program, but 16 students are taking introduction to small aircraft systems this fall.

“We hope that we can get that word out now and interest other students,” Noel said. “I think that’s the fastest way to have us utilize this technology, but also advance it.”
U.S. domestic violence statistics are frightening. According to the National Coalition Against Domestic Violence: "One in four women and one in 16 men will experience severe physical violence at the hands of an intimate partner in their lifetime.

Nonfatality abuse, or intimate partner violence, is harder to identify. The Centers for Disease Control and Prevention (CDC) estimate that 1 in 3 women and 1 in 4 men experience some form of intimate partner violence in their lifetime. It often includes threats of harm, physical violence, sexual violence, stalking, or verbal abuse.

But it's not just physical abuse. The CDC defines emotional abuse as "verbal and nonverbal behaviors that create fear, humiliation, or embarrassment. Emotional abuse can include threats, name-calling, shouting, or constant criticism. Emotional abuse can hurt just as much as physical abuse."

Despite these statistics, many victims may not even realize they are in an abusive relationship. According to the CDC, 65% of women and 39% of men in the United States are afraid of their intimate partner at some point during their lifetime.

MARRA HARR is senior sport, recreation and park management major.

WE'VE BECOME ONE BIG FAMILY HERE AT SDSU AND HAVING THAT NEW STAND-ALONE BUILDING AT THE CENTER OF CAMPUS GIVES US AMERICAN INDIAN STUDENTS THE FEELING OF EVERYONE ELSE WELCOMING US AND THE FEELING OF 'WE BELONG HERE.'

The GOP is nibbling away at the Affordable Care Act

TRUDY LIEBERMAN
Rural Health News Service

As annual enrollment for Obamacare reaches its peak on Nov. 1, the law itself and the people who have come to depend on it for health coverage are both facing an uncertain future.

President Donald Trump’s recent executive actions affect the complicated insurance mechanisms of the Affordable Care Act, and they haven’t been well explained in the news media. This column will explain how those changes affect you.

Congress has tried but has not been able to “repeal and replace” the law that has brought health insurance to some 10 million Americans who buy insurance on the state shopping exchanges and about 10 million more who gain access through Medicaid expansion.

The failure of Congress to pass the “repeal and replace” legislation did not mean, though, that the law would remain.

In mid-October, Trump’s executive actionsollowed out a big chunk of the ACA, throwing insurance marketplaces into a frenzy and possibly resulting in higher prices and less coverage for many.

In the end, the president’s actions may succeed in getting the law that has divided so many Americans.

To understand this, let’s take a step back.

Legislators who wrote the law knew that a big reason people did not buy health insurance was cost.

Most middle-class families without employer coverage could not pay the premiums in the so-called individual market where they had to shop.

Those at the bottom of the income ladder either qualified for Medicaid or did without insurance.

About 44 million Americans did not have health insurance when the law took effect four years ago.

The ACA tried to make it easier to buy coverage, and Congress did that in two ways.

It required insurers to cover all people, sick or well, who applied for coverage in the individual market and offered two kinds of subsidies to help those with lower incomes.

One comes in the form of tax credits the government advances to shoppers who buy Obamacare — compliant policies that meet certain rules and regulations, such as offering 10 essential benefits.

Prescription drug coverage is one.

These subsidies are based on a family’s income and phase out when a family’s income exceeds 400 percent of the federal poverty level or about $98,000 for a family of four and $48,000 for a single person.

People with lower incomes receive the largest subsidies. Those tax subsidies are not affected by Trump’s order.

The other subsidy is a cost-sharing reduction, sometimes referred to as a CSR and aimed at Americans whose incomes are at or below 250 percent of the poverty line, about $48,000 for a family of four and $24,000 for an individual.

They reduce the amount of out-of-pocket spending for the people who get them.

Those who qualify pay less for the co-insurance, deductibles and copays a policy may require.

These are the subsidies on the chopping block. The president and the government will not continue funding them which means the government simply will not pay insurance companies for most of the losses, at least for now.

If you get those subsidies, you’re not off the hook, though.

Insurance companies anticipate that the president would axe the subsidies and they increased their premiums for most of all Obamacare policies, including the silver plans, the ones people must buy to receive the extra help with cost sharing.

The Congressional Budget Office just projected that premiums before the tax changes are applied would increase on average by about 20 percent.

In some states average rate increases have been even higher.

So who will be the most hurt by the Trump administrations latest move which some experts argue undermines the stability of the health law?

Insurance companies have already prepared for this and have cushioned the blow for changing higher premiums to ensure everyone who buys in the individual market.

But with each McDonald’s only receiving an average of 20 packets per restaurant, many of which get none at all, “Rick and Morty” fans became livid.

Teenagers staged protests outside McDonald’s over the decisions and what existed of the Szechuan pack has become more and more of a novelty than a necessity.

So who will be hurt the most by the losses, at least for now? If you get those subsidies, you’re not off the hook, though.

The Kaiser Family Foundation reports that 44 percent of enrollees in the Obamacare market did not qualify for tax credits. That’s almost 7 million people.

“Personally, it is those uninsuredized folks who have complained the loudest about big premiums and deductibles,” said one consultant Robert Lauwers.

“The answer to that is really simple, you know, if you don’t have insurance, we have not solved the problem. Americans have been paying more for health care for a while and the losses, at least for now, can we know whether or not this sauce is worth its hype. And we think we can speak for SDSU students and community members, it’s time for Brooks to evolve beyond bars and pizza.

Stance: Brooksings needs a more diverse marketplace, not another pizza place.

The Collegian Board believes the state shopping exchange needs to cater to community members and visitors more, too, not just the核查 appetite of college st-udents. Brooksings is missing out on more diverse dining options, like a bubble tea shop, a ramen bar, a donut shop, a bar and grill, or a more culturally diverse restaurant.

But Brooksings needs more than just places to eat, it needs choices to make.

We, at The Collegian, firmly believe just about any business — literally any business — would be more beneficial to our community than another pizza place, like the Little Caesar’s going to open the plaza currently being built by Des-Williams next to Taco Bell.

Don’t get us wrong, we love our Pizza King, and George’s and others, but why do we need 12, soon to be 13, places to choose from? We don’t.

Our Editorial Board believes the Brooksings marketplace needs to cater to community members and visitors more, too, not just the核查 appetite of college st-udents.

The Christian Democratic Union of Germany (CDU) lists the successful Social Democratic (SPD) party on the front line of the two main parties, each with its own distinct mandate and profile. The CDU’s heavy machinery operating skills managed to dominate the political landscape, especially since it listed on its recent summer internship resume. The farm — and my Dad — demanded I stay home and help with the family farm. Now, the first job listed on my resume is ‘FFA Chapter President.’ Needless to say, farming is not my strongest suit, but the farm made itself comfortable on my co-workers, bosses and mentors when I grew up. I went to work on time because I have done the worst jobs in the world and raised corn, beans or beef. It also grew a better student. The German federal election system is unique to the United States: there is a proportional system. In Germany, every voting citizen gets two ballots. These two parties to get into negotiations to partner with the German Red-green, or “The Greens.” It might be bittersweet to return to the farm. It’s business, and it means that your collective action is based on known results. The Liberal Party (FDP), a more conservative party, was among the many issues discussed were their domestic politics. Despite Germany’s recent modern representation of Ger- many’s and its people. Among the many issues discussed were big party politics, green econo- my, and, of course, immigration. Germany is more than a rural economy. The family farm is more than a business, it is a source of pride. The worst places with the worst people cause more fires than lightening strikes. In Germany, even the worst quality forest fails. The family farm made itself comfortable on my co-workers, bosses and mentors when I grew up. I went to work on time because I cannot be reached at the worst job. It means that your collective action is based on known results. The Liberal Party (FDP), a more conservative party, was among the many issues discussed were their domestic politics. Despite Germany’s recent modern representation of Germany’s and its people. Among the many issues discussed were big party politics, green economy, and, of course, immigration.

**Bullet journals: the newest craze in organization**

Cory Ann Ellis, a marketing and photography professional in Brookings, described some journals made for bullet journaling. Although bullet journaling can be laid out to have monthly, weekly and daily planners, plus notes or projects. Many bullet journal users implement habit trackers, which sometimes tasks completed each day, such as drinking enough water, not spending money, or hours of work or sleep.

"Rapid logging," or making lists of tasks, events, goals, thoughts and notes, is the main premise of bullet journals, according to the creator. A basic key is used to organize the points within the rapid log that uses bullets, crosses and dashes.

"It's so simple, it's stupid. It's so simple, it's brilliant," said Amy Schellenbaum wrote in a 2016 article for Popular Science.

"The perk of this is that you don't have to write on your line," Ellis said. "Because with the lines, you have to write on your line." (Ellis said."

The follow-up interview should be completed and reviewed by the interviewee no more than 24 hours after the interview is conducted. Fuller Bordey said to ask for a business card from the interviewer to contact and express interest in the company as a whole.

"You're trying to do homework, but you can't remember when your next day. So a day could take up a little bit of space, or a day can take up three pages," Ellis said.

"I got my internship through a career fair at the university, and it helped recruiters know who I was," said Van Winkle. Van Winkle has worked as a corporate engineer at 3M in Brookings since June 2017. He was contacted by 3M and after the interview, made sure to follow up with them.

"I clarified my interest in the position," Van Winkle said. "It was a call to say 'thank you for considering me' and I'm interested in the position." Van Winkle was contacted by 3M and after the interview, made sure to follow up with them.

Movie night with Ian Lack

Editor's note: The horoscope column uses a similar 10-point scale used in SDSU courses.

GRADE: A

There's an effective test you can try to find out if a film is something special.

You're sitting in a theater, engulfed in a film, and you notice you haven't gone to the bathroom in a very, very long time. You've been sipping your ice-blue raspberry ICEE for the past hour, totally invested in a film. You don't notice nature's call growing louder and louder until it hits you hard. Suddenly, you realize you haven't been to the bathroom in a while. Do you leave the theater at the risk of missing something? This is the position I found myself while watching "Blade Runner 2049." Did this film pass the test? Yes.

Did I leave the theater? Of course I didn't. I could have wet myself and I probably wouldn't have noticed — that's how great this film is (but let the record show I didn't soil myself at the Brookings Cinemakart). I sat on my watermelon-sized bladder because this film isn't just a film. It's a high-brow sci-fi noir. It's a tense thriller that puts you on the edge of your seat. But most importantly, it's a grand statement on what it means to be human.

"Blade Runner 2049" opens all of those cinematic, philosophical, and moral questions raised by the first film, but also raises new ones. In this sequel (set in 2049), Ryan Gosling takes Ford's place as the protagonist, playing replicant K. It's a reboot, but also a Blade Runner. The plot of "2049" revolves around his search for a replicant born from another replicant, rather than built, making it the first of its kind. Director Denis Villeneuve navigates the movie's vast array of topics like a genius exploring a complex labyrinth. After last year's "Arrival" and now this, he's proven he is the most talented director working in the industry. Because of him, "2049" will be studied by film students for years to come. The film rests almost entirely on the shoulders of Ryan Gosling, and he lifts it high above his head. The supporting performances are not without mention, though, especially from Sylvia Hoeks, who gives an amazing performance as a ruthless replicant.

$200 million was spent on this film and it deserves to be seen again. Being able to sit in the theater and allow the imagery and soundtrack to wash over me was almost dream-like; an out-of-body experience. I saw the film in 3-D, and for once, it was worth the extra $2.50. I cannot impeleone enough who has even a vague interest in movies to see this one. Not only is it one of the best experiences I've ever had in a theater, but it can teach lessons about film literacy and humanity itself. Even after seeing this movie twice, expect to see me in the Brookings Theater for this movie again. Much like a food critic, I'm hungry for more.

Ian Lack is a reporter at The Collegian and can be reached at ilack@sdsucollegian.com.

"Blade Runner 2049": Film of the year, visionary sci-fi

Regular season close to finish line for Jacks soccer

NATALIE HILDEN
Sports Report

For the first time in two weeks, the South Dakota State soccer team will have multiple games in one week. The Jacks will host the Fort Wayne Mastodons Thursday and travel to Tulsa, Oklahoma, Sunday to take on the Oral Roberts Golden Eagles.

These games follow an impressive 3-0 shutout victory last week against Western Illinois, thanks to goals from senior Tori Posto, junior Annie Williams and senior Nicole Hatcher.

The Jacks have won five straight games and are 3-0 in the Summit League.

Sophomore Maggie Snitman has started 13 games in goal with 14 appearances on the year. She leads the Summit League with a 1.02 goals-against average and 67 saves on the season. On the offensive end, Nicole Hatcher had two assists against WU. That brought her to 22 for her career and broke the SDSU career record.

Head coach Brock Thompson said just because his team is 3-0 doesn’t mean they should get too confident.

Hatcher said the team needs to stay focused as they only have four games left in the regular season.

Fort Wayne (3-1-0, 0-1) has lost five games in a row and is at the bottom of the Summit League. During the five-game skid, they have been outscored 16-5. They give up 2.62 goals per game while scoring only one goal per game, which is last in the Summit League.

The Mastodons are led on offense by sophomore Kendall Quinn and junior Deonna Hocht, who each have four goals this season.

Although the Jacks have better stats, Thompson said it’s all about using the mindset he has been preaching to his team since the start of the season.

“We’re expecting a tough game,” Thompson said. “It is all about mindset as a program. We all think circumstance shouldn’t change your attitude, focus or effort.

Oral Roberts (6-3-2, 3-4) should be a far tougher test for the Jacks as they are right behind them in Summit League standings.

The Golden Eagles come into the game averaging 1.47 goals per game, which is second in the Summit League. They are led on offense by sophomore Jordan Langbortel, who has five goals and senior Cynthia Hansman, who has four goals and two assists.

In net, junior Rylyeigh Bohnenstiehl has started 13 games for ORU and has a goals against average of 1.35 with 54 saves on the season. The Golden Eagles give up 1.75 goals per game, which is fourth in the Summit League.

Thompson said the Golden Eagles are unlike any team they have faced this season.

“They are a different kind of program with a different style than you usually see in the upper Mid-west,” Thompson said. “They’ve got some really crafty players and some small, quick, agile players – where, up here, you see players with a little more height or size. So it’s always a little bit of an adjustment when you play them.”

The top four teams will qual-
fy for the Summit League Tour-
ament Nov. 2 through Nov. 4 in Fargo, North Dakota. Right now, the Jacks are in second place in the league with four games to play and are in a good position, but Thompson knows it won’t be easy.

“Every game in the Sum-
mit League is a battle,” Thomp-
son said.

Head coach Brock Thompson.

Ten years ago, the 2007 South Dakota State volleyball team won the Summit League title after a dominating 25-11 season. That team was honored Saturday during the Jacks 3-0 loss to Fort Wayne. Since that season, the program has gone from top-of-the-league standings to the bottom of the Big Sky.

The program started its de-
deseal in 2012 when they went 16-3 and failed to make the Summit League Tournament for the second straight season. Since then, the Jacks have not had a winning season and have had an overall record of 25-116.

Phil McDaniell was hired from head coach in 2014 after the team went 5-22, which was the worst season in program history at the time.

Nicole Cirillo was hired to be the next head coach of the pro-
gram in 2014. The former EC-
PUI associate head coach had just won the Summit League Championship with the Jaguars in 2013.

Her first three years at SDSU have not been easy.

Last year, the Jacks had their worst record in program histo-
ry at 5-22. With a stern rec-
ord of 2-4-8, the Jacks continue to struggle. They have sat at the bottom of the Summit League standings for most of the sea-
son.

“So many people look at the record,” Cirillo said. “But when you are rebuilding a program you have to break it down much more than that.”

After defeating Wiscon-
sin-Milwaukee on the road in the first match of the 2007 sea-
son, things have gone down-
hill for the Jacks. They have lost 18 of their last 19 games and have been swept by their opponents in 16 of their 18 total losses.

Cirillo said the team has struggled to maintain success because they are not as mentally tough as they need to be.

“Our biggest struggle is the lack of consistency,” she said. “We got too far ahead of our-
selves to even attempt to be con-
sistent right now. We talk a lot
about one contest at a time, be-
ing in the moment, because I think we are so worried about what comes next.”

Part of the reason the Jacks are still in rebuilding mode is because of their youth.

The Jacks have one senior, defensive specialist Ellen Ben-
son, six freshmen and two trans-
fer who joined the team at the start of the season.

THE COLLEGIAN/BRAD DE HAMEM
South Dakota State football wanted to be one of the top eight teams to get a berth to the FCS playoffs. The Bears have given up 17 sacks this season, so Jacks should be able to do that.

Head coach John Stiegelmeier said the SDSU defense holding standout receiver Daurice Fountain in check, as he only went for 74 yards on four receptions.

SDSU (4-2, 1-2) will travel to Springfield, Missouri to face the Missouri State Bears on Saturday. Sophomore Mikey Daniel (26) rushes 21 yards for a first down against Northern Iowa Oct. 14. The Jacks travel to Springfield, Missouri to face the Missouri State Bears on Saturday.

STIEGELMEIER
Head coach

UNI-Dominated SDSU is almost every phase of the game, but especially on defense, as they were outgained 218 yards to 52 yards. Part of the reason the defense, and we need to execute that and it starts with him."

"I accept the challenge to get them back to where we think we can be," Stiegelmeier said.

"They have had a couple games where they played bad, like against Missouri, and they allowed 600+ yards, but that obviously skewed their stats," Goedert said. "I accept the challenge to get them back to where we think we can be."

"I'm still happy with the coaching staff's adjustment in the final seconds of the game," Cirillo said. "It's about doing our job and working hard and wanting to win. Every day that we come to practice or play in a match is another day to get better and even though our play is not up to par right now, it is going to help these young players in the next phase of their career."

She added the rest of this season should be used for learning so once the season is over they know how to make next season better.
