Large Number Project Students Like Their Work

Philip Anderson of Rowena, reports that his 40 acres of corn is doing nicely and has been the center of much attention in the neighborhood near Big Sandy. He has used the yield if frost holds off for a few days more.

Alfred Bim of Sherman, spent an afternoon early in the season learning how to capricious cows.

Adolph and Fred Brehe of Aggie are doing a very interesting piece of work with their new line of cattle. Adolph is feeding a ration of oats, and barley, (ground equal parts) tankage and alfalfa pellets at every two feedings. Fred is feeding his pigs ground barley, tankage and tankage on good, clean alfalfa pasture. Ten pounds of tankage to 5 pounds of barley. Both use the self feeder.

We will hear more about their results later this fall. The fertilizer yielded by Adolph was much more than Fred's.

Nicholas Bruneau of Jefferson is busy this summer helping his father and brothers with several calves. When you go to Sioux City stop and see him.

Stanley Conkey of Wayland is very enthusiastic about his milk project. He also believes in working early and late on his father's farm.

Lawrence DesAn of Gaddes has a splendid chicken and is showing the grand champion baby beef of Charles County, according to a letter recently received from the big state fair.

Prominent Farmer Talks of His Farm Operations

Lyman Merry, '20, of Del Rapids, writes:

Dear Ted: Have been going to write to you for some time and tell you that the News is read and re-read here and away. We note your successes in College and also of members of your acquaintance. Robert and myself are operating the home farm and this year finds us with a good crop. Keep quite a number of cattle, some 150 head of spring pigs and keep from 50 to 75 head of cattle. We have plenty of alfalfa and feed all grain on the farm. We are going to plant some grass and alfalfa to make a wonderful combination for milk cows and beef cattle and would like to have you come and see it.

Lyman Merry, '20, of Del Rapids, writes:

We are going to plant some grass and alfalfa to make a wonderful combination for milk cows and beef cattle and would like to have you come and see it.

Like the rest of the Aggies we are busy. Have 180 acres of corn. We are generally found at home and would be glad to see some of those Aggies and have them drop in at any time.

Tell Mr. Scarbrough hello for me and let the School keep up its good work. It is good to see the progress the greening movement is making. We had those things when we were at school, but during the last few years, we met with those good times with somewhat of a regret and cannot but feel those days as Aggies were valuable ones to us and left many an influence with us which has been of much help as we go on in life and we wish you more of it. When you come to Del Rapids, drive out.

Many Students Eligible for Gold A Club

Reunion to Be Held on Wednesday, September 14th

Aggies and their friends who attend the School of Agriculture and have graduated within five years may receive a Gold A club membership this year in the new building for their headquarters.

The time for the well organized pro- gram will be held on Wednesday, September 14th. The new building will provide seats for all Aggies and their friends.

The chairman of the committee has been for Aggies to get together and renew acquaintances and make new friends. The program which is being arranged for is charge of Day Lynn of Rockham. According to Paul J. Scarbrough, principal of the School of Agriculture, the program of the Aggie students make the exhibits interesting by giving explanations and also demonstrations of the work carried on in the school. These demonstrations will illustrate some of the subject matter taught in the School of Agriculture, and others students will make exhibits of charge of the club emblem, the "Gold A," are considering a special pin for the class of 1987, which is being planned to be more than recent more than five students in one year.

According to plans those students who have completed at least five years in the School of Agriculture and have received an "A" in the school, school, think what it will mean to him and also the future of those new students as well as to the School.

Nurses Training Popular Among Girl Graduates

Three Enter Training from School of Agriculture Class of '27

This year three Aggie girls, Nina Hoxem, '27, Hendricks, Minn., Stella Waddell, '27, Garden City, and Thora Olson, '27, Brookings, are entering into a three year course in nurses training, leading to the degree of Registered Nurse. They feel that their training in the School of Agriculture has made a very good foundation for their future plans. Whatever success they may acquire, they feel that a great deal of credit should be given to the institution in which they have received their basic training.

The School of Agriculture not only gives girls a course in home economics but it also offers them other subjects that help in choosing a profession.

Nurses training seems to be a popular line of specialization among girls graduating from school. All junior and senior girls are required to take an elementary course in nursing. This gives them the opportunity of learning some of the fundamentals of efficient nursing; it is a great advantage in the employment of a large field for service, where many workers are needed.

Burke and Steinhauser are holding classes in the School of Agriculture for the training of nurses. Burke and Steinhauser are holding classes in the School of Agriculture for the training of nurses.

The Horticulture office are made up with the idea of giving some of the work taught on the propagation and care of shrubs and trees grown on the farmstead and on the farm wood lots. The Smith brothers of Freeman will demonstrate the process of budding and grafting which is one of the

Arlington Eddy Accepts Position

Has Been Prominent Club Worker

Arlington Eddy has accepted the position as one of the instructors of the Home Economics department for the coming year, taking the place of professor Emerund Reineme, who resigned to take over the management of his ranch at Beulah, South Dakota.

Mr. Eddy graduated from the Washington State College of Agriculture in the class of 1923. That fall he entered State college, classifying in the Agriculture Department. He received his B. S., degree with the class of 1927. Mr. Eddy is associated with his father in the management of the D. Z. Stock Farm, northwest of Wessington Springs.

In the spring of 1918 Arlington enrolled as a member of a 4-H club that was organized in his neighborhood. He has been very active as a club member, local and county chairman. In his second year in club work, he pulled Hereford bull calf that he sent to the National Show and Sale at San Francisco club first took top place and sold the sale. The next year his calf went to the National at Des Moines, won first in the show and topped the sale. Last year Arlington took second and third in the National at Des Moines. Then he sent his own calf to the National at Des Moines, won first in the show and topped the sale.

Mr. Eddy has been a very active student at State college and has taken a very keen interest in college football and Little International. Last December he was a member of the college football team, representing the state college, both in the livestock judging and the meats judging, making a high score in both lines of work.

The School of Agriculture is fortunate to secure the services of Mr. Eddy. His practical experiences, coupled with his excellent college training, makes it possible for him to serve State college and the Aggies as a very practical, efficient and constructive instructor.

School of Agriculture Calendar 1927-28

October 17, 1927, Monday—Tues- day—Freshman registration.

October 19, 1927—Wednesday—Freshman registration.

November 5, 1927—Saturday—Hobo Day, a holiday.

November 24, 25, 26, Thursday—Thursday-Saturday—Vagabond vacation begins at noon. November 28—Christmas vacation begins at noon. January 5, 1928, Thursday—Class work resumed at 8 a.m. March 19, 1928, Thursday—Spring Break Day.—(Date to be announced later.)

March 18, 1928, Sunday—Sermon to freshmen.

March 20, 1928, Tuesday—Commencement exercises at 10:30 a.m. April 30, 1928, Tuesday—Agriculture Alumni and Student Reunion.

May 22, 1928, Thursday—School of Agriculture closes. 4:15 p.m.

Like Their Work

(Continued from Page 1)
Wayne Evans of Hot Springs is making his competition in the pig club, work for their money. He has his first and only pig which provides a A-type of house for shelter. We will all look forward to the next trip at the fair grounds at Buffalo Gap. Beat 'em if you can! Wayne!

Oscar Flanard is helping his brother with the work at St. D. O. nursery, caring for a flock of sheep on a School of Agriculture project.

Hat old Hagen, Watertown,ifers on two head by the State College 4-H Club at Herman, with the Little International. When his project was improved it was in excellent condition.

Myron Kingston, Kish, is carefully guiding his project taking all pre- caution possible to prevent disaster. He carries the feed-bills of the flock and a special pasture in the sweet clover field.

Glifford Johnson lives in one of the homes in Vermillion. If they are interested in a real up-to-date farmstead, with every convenience in the way of machinery, stock and farming a little for himself, he is planning on attending college, but it cannot happen this year.

Alfred Breath, class of '26, is at home, and his part is lacking and that is a house- keeper. Alfred has a fine new bungalow. We wonder if Alfred is not going to share this nice house with romine—some Aggie for instance.

Earl and Merl Efrink '27 are farming near Bigelow.

Ralph Bower, '15, of Timber Lake, is back on the farm near Dell Rapids. He has about 60 acres of oats harvested, and gets a crop if anyone does. He has just finished his part in their community club.

Edward Gleich, '25, former class member and leader of the Ravius Progressive 4-H Club of Charles Mix County, is now engaged in farming near Doland, and folks and farming a little for himself. He is planning on attending college, but it cannot happen this year.

**DAD SCARBO HAS RECOVERED FROM ILLNESS**

(Continued from Page 1)

The program outlined by the new president is constructive and should have the support of every Aggie.

A new Aggie bulletin has been published this week. It is being in summer mailing circulars and bulletins to prospective students. A copy of the bulletin should be obtained at once before school opens. A few changes have been made in the bulletin. These changes make it possible for the students to get the subjects they wish at their registration appointment schedules.

Ben Reifel, president of the Aggie Y. M. C. A., and his cabinet will be on the job when school opens to look after the new students and help them get acquainted and started in their new school program. There has been a real need for this personal service. The school will be greatly benefited and the one who receives a warm welcome will start on their year's schedule (through this work of Ben Reifel and his assistants).

Lost—Somewhere between Brookings and San Francisco, Ted Schulte, president of the Alumni Association, yarded Ted's father's bull. We know he is having a wonderful trip and it is much too busy to write to anyone at home. Ted usted his vacation and may expect a full page from Ted in the next issue of the News telling all about his trip.

**Meets the Convenience of the Students**

Ray presented the award for taking sick, put it off until June, 1930, so taking an Aggie to the right special nurse.

It is quite a job to mail out good news of the News telling all about his trip.

The janitor has been busy keeping the halls clean. The second part of three teams illustrating the work which they have made in art will be performed in their summer project work for this work carried out in the School of Agriculture.

Who are always doing a good job of Sterling County telling the students about their farms.

Don't Forget HOBO DAY November 5

**Wedding Bells**

On Thursday, July 28, occurred the marriage of Gladys Jensen and Lawrence Petersen of Viborg. Their honeymoon trip in the Hills was shortened because of continued rain and they returned via the northern route. At Garden City Gladys visited her former room and class mates, Katie WaddeLL, and at Hazel boy, Alvin, who is a member of the Y. M. C. A. and raised a large crop of milk from the farm. Mrs. Petersen was secretary in the creamery at Central Point for two years. She also served as local leader of a girls club composed of fifteen members. Gladys is also a prominent worker for the farm boys, which is held every summer at Swan Lake near Viborg.

**Meade County**

Miss Ethel Boyd, Kimball, and Mr. Loren A. Poole, Mud Butte, both members of the class of 27, were married July 27 at Kimball. Relatives and Floyd Costain of Parker, class mate of the young couple, witnessed the ceremony. The bride was gowned in a beautiful dress of rose crepe with a stone fitting rose crepe hat to match. Following the ceremony the bridal party returned to the bride's home where a six o'clock dinner was served.

Mrs. Poole is the eldest daughter of Mr. and Mrs. W. A. Boyd, prosperous farmers of Brule County. She was brought up on the farm and raised a large circle of friends and acquaintances. The groom is son of Mr. and Mrs. E. A. Poole, well known ranchers of Meade County. He is a young man of sterling qualities.

**NEW BUILDING HEADQUARTERS AT STATE FAIR**

(Continued from page 1)

Practical sides of the horticulture work.

In the horticulture department of the Aggie building there will also be demonstrated the use of flowers in the art of table decoration. This work will be in cooperation with Professor N. E. Hansen. A number of the junior members attending the State Fair will also help with this work.

**Home Economics**

Eight of the junior girls will put on canning demonstrations and clothing demonstrations. In the canning exhibit an unique arrangement of the preserved foods which the girls have prepared in their summer project work has been worked out. The canned food will be placed on revolving shelves which will be pierced by powerful electric light rays, thus showing the beautiful coloring of the fruit. It will be well worth your time to stop and get acquainted with the eight junior girl's aids and get some idea of the work they are doing in the school and after they have finished school.

The canning work is just a small part of the demonstration which will also be put on at the Aggie building for the girls will exhibit a number of articles which they have made in art classes under the direction of Professor Cavour and the Art department at State College.

**Wood Work**

Probably one of the most interesting demonstrations which will be put on at the Aggie building is the wood working demonstration which will be carried out by eight of last year's first year boys. This very interesting demonstration will consist of three teams illustrating the work they carried on in the farm wood working department at State College. One branch of the work to show methods of simple rafters cutting in the building of many small farm buildings. The second part would be

Here's what an Aggie Grad says about

**THE SCHOOL OF AGRICULTURE**

"The School of Agriculture is a splendid opportunity for the young man or woman who earnestly seeks an education, whether it be a stepping-stone to higher fields of education or a preparation to meet the stress in a life's work. It is a school that is acquainted with the practical things in class-room and laboratory work.

It is conducted by a competent teaching staff."—

Hilbert F. Schwartz.

Tell your friends and prospective students what you think of it.

For bulletins, circulars or other information write to

Principal, School of Agriculture

South Dakota State College
Brookings, S. D.

**NEW BLACK HILLS HOMES**

Words and Music by—

Ray Magnuson

After spending his boyhood days in the Black Hills, Ray Magnuson is back in the Western South Dakota where so many of his former students will find him working at the University of South Dakota. His old students will, no doubt, recognize Ray as the same young man who was doing carpentry work on her family's farm in Eastern South Dakota. He will always be known as Ray Magnuson, the voice that sings the songs of the Black Hills. Its streams, trees, and rocky formations which mere words can never describe, will come to life in such a way, with words and music, as to make South Dakota's wonderful black hills truly come alive. Though you were really living again those days spent in the Black Hills.

**40¢ Post Paid**

For sale by—

A. A. McMullin
Brookings, S. D.

The demonstration will consist of the painting of paint on the farm. No doubt this will be worth your time if you are contemplating the building of farm buildings at a minimum cost. In addition to the other parts of the demonstration you will be able to see the students at work repairing screens with a new and efficient method. The members of the class in blacksmithing will not be announced until the first of September.

**Blacksmitbing**

Another very interesting phase of work carried out in the School of Agriculture will be the blacksmithing booth, with the simple tools and blacksmithing tools and novelties exhibited in the booth. Many of you have seen some of the products exhibited by students in the blacksmithing classes, but very few of you have had the opportunity of having hands on work that have done the work tell about it, and how they put it into practice when they return home.

**Rope Demonstration**

In the rope demonstration the Aggies demonstrating the solving of knotty problems on the farm are Walter Slocom of Glenham, Ben Reifel of Yankton and Gerald Leonard of Cavour. This demonstration has the advantage of being practical in the practical skill and knowledge which a great many farmers wish they could have. Be sure to drop into the Aggie building and watch these boys make practical applications of the use of rope on the farm. They will demonstrate the tying of a great many simple knots, the finishing of rope for use in the splicing of rope, an art which many people think difficult to learn. Let the boys show you just simple the processes are of short and long splitting.

**Agronomy**

The class in field crops will have an entire area of land to grow high quality crops. Eight students will demonstrate many facts concerning the cultivation of crops. The student demonstrators in this booth are:

In general you will miss the time of your life if you are not acquainted with the boys who are students in the School of Agriculture. They have made the trip. They are going back to the farm to put into practical use, the knowledge received at school, and they are more efficient farmers and hom.—

makers.
