Collegian Index
1996-1998

Introduction

This index provides subject access to the SDSU Collegian. Included are all articles written by the staff as well as wire-service news stories. Excluded are brief announcements, notices, and minor sports events.

This index cumulates two publishing years, covering September 1996 through April 1998. Future indexes will be published at the end of every other academic year.

Although this is a computer-assisted index, subject headings are not automatically assigned from key words from headlines. Whenever the headline words do not accurately reflect the content of the article, appropriate subject headings are assigned. Names of the editor, columnists, and staff writers on the opinion page are included in subject headings. Excluded are names of those writing letters to the editor and other reporters.

Subject entries are limited to eighteen characters, including spacing. Thus, abbreviations and incomplete headings are sometimes necessary. For example, Student Association elections are listed as SA-ELECTIONS. A cross reference is made whenever necessary, (e.g.: STUDENT ASSOCIATION see SA). Place names in subject entries are also abbreviated to save space (cities and states in two letters; countries in three letters) but are spelled out in the notation.

The following abbreviations are used throughout the index:

An asterisk (*) at the beginning of a notation indicates that an illustration accompanies the story.

(L) At the end of a notation denotes a letter to the editor.

(ED) At the end of a notation signifies an editorial.

Whenever space allows, a reporter's name is included in parenthesis at the end of notation.

Entries are arranged chronologically under each subject heading. The input record is composed of three fields:

1. Subject headings—e.g.: AAUW
2. A twelve-digit code containing the date (month, day and year) and pagination (section, page, and column)—e.g.:

04 = April

05 = Day

1989 = Year 4/05/1989

D = Section

03 = Page

1 = the column D031

* = illustration

3. The headline notation—e.g.: "SALE SLATED."

Thus, an entry composed of the above units would read:

AAUW 4/05/1989 D031 SALE SLATED

SDSU COLLEGIAN
