On the map: Jobs and Housing

Mary Killsahundred
Demography Conference
June 2014
Getting Started...

- Interactive mapping tool
- Currently appearing in its 6th Version
- Contains data for 49 States (plus District of Columbia)
- Includes Census Blocks and other geographies:
  - Counties
  - Cities and Towns
  - Reservations
What On the Map is used for...

• Provides information about **Workers**
  - Where they work
  - Where they live
  - Race, ethnicity, sex, age, earnings, industry, and educational attainment

Presents data using: maps, reports, and/or charts from 2002-2010
What information does not appear

- Workers who are self employed
- Military
- Informally employed
Data Sources

• Office of Personnel Management
  o Employees and jobs for federal Employees

• Quarterly Census for Employment and Wages
  o Firm Structure and the location of a business or establishment

• Unemployment Insurance Wage Records
Types of Reports

1. Area Profile Analysis generates results showing the location and characteristics of workers living or working inside the selected study area.

2. Area Comparison Analysis generates results showing the count and characteristics of workers employed or living in locations contained by the selected study area. The "Areas to Compare" option determines the type of locations to be compared.
Types of reports (cont.)

3. Distance/Direction Analysis generates results showing the distance and direction totals between residence and employment locations for workers employed or living in the selected study area.

4. Destination Analysis generates results showing the home or work destinations of workers employed or living in the selected study area. Select the geographic destination type (i.e. counties, cities, tracts) using the "Destination Type" option.
Types of reports (cont.)

5. Inflow/Outflow Analysis generates results showing the count and characteristics of worker flows in to, out of, and within the selected study area.

6. Paired Area Analysis generates results showing the location and characteristics of workers that share the selected home and work areas.
Steps in creating Maps and Reports

1. Search and choose a geographic area using Search tool in the Start tab.

2. Click “Perform Analysis on Selection Area” in the resulting popup window.
Welcome to OnTheMap!

Start an analysis by using one of the tools below (Search, Import Geography, or Load .OTM file). Hover over the Help icons located throughout the application to see Help tips for using specific functionality. Sections in the control panel can be collapsed or opened by clicking the section title.
