Econ Pamphlet 87-1

February 1987

Requests for copies of the publications listed in this pamphlet should be addressed to the Economics Department Librarian, SDSU, Box 504A, Brookings, SD, 57007. Single copies of most are available at no charge. If xeroxing costs are involved, you will be notified in advance of being assessed the charge.

PREFACE

February 1987

The Economics Department faculty pursue all the traditional functions of a land-grant university: teaching, research and extension. This report lists the publications developed by research and extension economists in the course of fulfilling the above functions.

All types of publications are included and are arranged by the basic areas of concentration in the department: agricultural marketing, farm and ranch management, energy and water resource development, rural development and public affairs. Publications for the period 1984-1986 are included in this report. An earlier report covered publications for the period of 1980-1984. A small number of copies of the earlier report are available and can be secured by writing the department.

We hope you will find this report and the publications useful.

Sincerely,

Ardelle Lundeen
Professor and
Acting Head

TABLE OF CONTENTS

Agricultural Marketing

Achieving higher farm product prices and income 1

Improving transportation services 3

Farm and Ranch Management

Managing production costs 4

Managing resource acquisition 5

Energy and Water Resource Development

Energy development 8

Energy use and irrigation development 8

Rural water systems 9

Other 10

Rural Development and Public Affairs

Financing state and local government 11

Rural employment and income 11

Economic, agricultural, and food policies 12

Other 13
