ACCESS NOTE

Open. This material does not circulate and may be used in-house only.

PREFERRED CITATION

Name of item, Collection identifier, box #, folder #, Collection Title, South Dakota State University Archives and Special Collections, Hilton M. Briggs Library, Brookings, South Dakota.

ABSTRACT

The mission of the Jerome J. Lohr College of Engineering is to provide a rigorous, practical education oriented toward problem-solving; to conduct world-class regionally relevant research; and to provide technical assistance to existing and emerging businesses, industry, and government.

This collection is composed of materials related to Engineering and Science Research, biographical information on prominent persons related to the college, material dealing with the engineering controversy of the early 1970s, the Impulse magazine, and history of the college.

HISTORICAL NOTE

The first catalog of South Dakota State University contains plans for an engineering course of study. A full course was outlined for interested students, and in 1891, the two members of the graduating

class were engineering students. Courses were taught in civil and mechanical engineering, and the electrical engineering course was taught through the Department of Physics, known for a short while as the Department of Physics and Electrical Engineering. By 1900, enrollment in the engineering course had grown to such an extent that separate departments for civil, mechanical and electrical engineering were established.

In 1924, all departments of South Dakota State University were arranged into five units known as divisions, precursors of the modern colleges. The Engineering Division offered coursework in electrical, mechanical or civil engineering leading to a Bachelor of Science degree. Physics and mathematics were in the general science division, and the Agriculture Division administered agricultural engineering. All later moved to the Engineering Division and are today part of the College of Engineering.

Decreasing enrollment in engineering courses at the university, combined with ongoing financial problems, led the South Dakota Board of Regents to make an unpopular recommendation in 1976. Known around campus as the Engineering Controversy, the proposal recommended that only one engineering school, to be housed at the School of Mines in Rapid City, was needed in South Dakota. The plans for carrying out the proposal went far, but the proposal was never carried out. Nevertheless, it caused a significant stir both in and out of Brookings and resulted in a renewed interest in the College of Engineering.

In 1986, the College of Engineering established a new program to serve South Dakota. The Engineering and Environmental Research Center was established to serve the university, citizens and industry of South Dakota through a variety of programs. Among the programs established was the Engineering Extension Service, which formalized the extension work of the college. Also included are the Office of Remote Sensing, the South Dakota Local Transportation Assistance Program, the University/Industry Technology Service and the Manufacturing Extension partnership.

Jerome J. Lohr came to South Dakota State University in the fall of 1955 to pursue a degree in civil engineering. The College of Engineering has produced entrepreneurs, innovators and leaders in the profession throughout its 132-year existence. Yet Jerry Lohr has no peer in terms of his overall and lasting impact on the College - as a donor, fundraiser and advocate.

SDSU decided to honor Lohr's profound role in transforming the college by recommending that it be named the Jerome J. Lohr College of Engineering. SDSU's recommendation was ratified by a committee of the South Dakota Board of Regents, and then accepted by the full Board on June 20, 2013.

CONTENTS NOTE

This collection is composed of materials that pertain to the college. Folders contain booklets, programs, brochures, correspondence, minutes, periodicals, reports, posters, and photographs.

A large portion of the material deals with Engineering and Science Research at South Dakota State University. This material consists of summary sheets, reports, and correspondence and is arranged by a researcher's name. This material covers research for engineering, chemistry, pharmacy, and agronomy.

Also included is biographical information on prominent people related to the College of Engineering, including, Harold M. Crothers, Harry Solberg, Halvor Solberg, and Guy Lee Boyden.

A file on the engineering controversy of the early 1970s dealing with the possible transfer of the College of Engineering from South Dakota State University to another institution in the state. This material consists mainly of clippings, but also included is correspondence and notes.

Other items of note include several files of brochures on the various programs offered by the college, the Impulse magazine, a periodical published by the college featuring events and happenings in the college, and file dealing with the history of the College of Engineering at South Dakota State University.

SUBJECT HEADINGS

SUBJECTS

- South Dakota State University. Jerome J. Lohr College of Engineering
- Engineering – Research
- Engineering – Study and teaching (Higher)

ACCESS

CONDITIONS GOVERNING ACCESS

This collection is open to researchers without restrictions. The materials in the Archives do not circulate and may be used in-house only.

Researchers conducting extensive research are asked to make an advance appointment to access archival material. Please call or e-mail prior to visiting the collection and indicate as much detail as possible about a particular topic and intended use.

CONDITIONS GOVERNING REPRODUCTION

South Dakota State University supports access to the materials, published and unpublished, in its collections. Nonetheless, access to some items may be restricted as a result of their fragile condition or by contractual agreements with donors.

RIGHTS

COPYRIGHT NOTICE

This collection is protected by copyright and/or related rights. You are free to use this Item in any way that is permitted by the copyright and related rights legislation that applies to your use. For other uses you need to obtain permission from the rights-holder(s).

Researchers may quote from the collection under the fair use provision of the copyright law (Title 17, U.S. Code).

Requests to publish should be arranged with the SDSU Archives and Special Collections.

CONTAINER LIST

Box	Folder	Description	Date(s)
1	1	70 Years of Engineering, 1884-1954	1954
1	2	American Society for Engineering Education-Mechanics Division	1956-1957 circa
1	3	Annual Reports	2014-2018
1	4	Annual catalog - Division of Engineering	1962 April
1	5	A.S. in Manufacturing Technology open house	2000s circa
1	6	Boyden, Guy Lee	1954
1	7	Briggs Scholarship Interview Weekend	2004 February 27-28
1	8	Building a Career in Engineering	undated
1	9	Clippings	1960-1993
1	10	Cade of Ethics for Engineers	1987
1	11	College of Engineering booklet	1990s circa
1	12	College Training for Engineers	undated
1	13	Comparative Ranking by H.M. Crothers	undated
