The File and Find Filing System

A standard and adaptable filing system makes possible more efficient office management. It increases the quality and quantity of services rendered to county people by members of the Extension staff. Increased demands on county Extension agents by individuals and groups for technical and current information necessitates that agents have access to current, complete, and well organized files.

It is important that you have an appreciation for, and a working knowledge of, this system. It is flexible and adaptable. Study this updated system before revising your present system. In most counties few changes will be required as it follows, with modifications, the File and Find circular published in 1971.

The numbering system for reference folders used in this system enables specialists to code information sent to county offices. This feature lightens county filing chores and enhances filing accuracy.

Organization and Characteristics

In revising the File and Find an attempt was made to reduce duplications, bring related subject matter together, cross reference materials, and provide a place for new agencies, programs, and subject matter.

A decimal system is used in coding File and Find reference material. Note in Section II on Administration a letter prefix was used for the various divisions. The letter prefixes were not used in the Reference area (Section III) so the same numbers could be used again and in section IV 4-H and Youth where all divisions are prefixed with an H. Folders and/or hanging files need not be complete for areas where little information is required or available.

Do's of Good Filing

- Discuss the filing system and how filing responsibilities will be divided among all office personnel.
- File all material in clearly labeled folders.
 Place the last material added in the front of
- the file folder.

 4. Designate a tray or drawer on or in each agent's desk for materials to be filed.
- Keep filing up-to-date. File each day if possible. Develop a system or plan for filing and stay with it.
- Adopt a system of recording all material taken from the file for use by persons other than county staff members. Keep the practice of lending files to a minumum.
- 7. It is better to take an entire folder from a file than to take one item from a folder. Code material in folders in upper right hand corner with the folder code number. It makes refiling easier.
- Be selective in filing. File only usable materials.
- Place file headings from left to right so that the file can be read as a book.
- Accuracy is the first essential in filing. Speed is secondary.

- Label file drawers accurately and clearly.
 Kaep an updated copy of File and Find handy for quick reference.
- 12. All six sections of the system need not be in the same location. Locate files closest to persons using them the most. Inactive files should not occupy needed office space.
- Use an adequate number of folders--do not overload files. New, properly labeled folders must be added as need arises.

Plan for File Disposal or Retention

Have a plan or schedule for transferring material from active to inactive files when a project or program has been completed. Eliminate records which have no further use.

An ideal time to clean and up-date files is after completing the annual report.

Clean out the correspondence file annually. Transfer letters containing important current subject matter to appropriate reference files. Dispose of routine correspondence over 12 months old.

Up-date administrative and project files each year according to the new year's programs and activities. Transfer selected records to an inactive file. Section VI is a suggested inactive file outline categorized according to periods of time such files might be retained.

Suggestions for Revising Files

The first step in revising your files is to carefully study this system. Discuss each section with all members of the county staff. Include the office administrative assistant and/or secretary in these discussions as that person must thoroughly understand revision plans and procedures to be of greatest assistance.

It may be advantageous to eliminate some folder headings and add others to adapt the system to your filing needs. This system was intentionally revised to permit its adaptation to all South Dakota counties. If expansion of a given reference subject is desired, code in the addition(s) below the appropriate heading. Be sure to use the same coding system. If there is insufficient space below or to the right of the subject to be expanded, it may be desirable to retype the sheet with the needed expansion.

Do not, however, change the key numbers of folders or guides as they appear here, as specialists will be coding fact sheets and other information according to this system. Add

numbers but do not change numbers.

It is suggested that guides and folders be prepared in advance using the headings and numbers in the handbook or as may be added or deleted to adapt to the system. As material is removed from old folders, it can be put into the new file. In this way one file drawer may be changed at a time, thus regular office work is not disrupted too greatly.

Folders may be added in two ways. First, by expanding the number-decimal system. Second, when frequent changes are likely or more than nine subdivisions are needed after a single file division, it may be well to arrange folders alphabetically.

You may wish to use different colored labels to enable you to pick out major subdivisions in the file more easily. Green background labels for the primary tab on the left and light blue background labels for the secondary tab, white for the third level tab, orange for the fourth level tab and yellow for the fifth level tab on the extreme right. Use a red tab on any folder for minutes and select a seventh color for any other special designation.

Specific Instructions for County Extension Agents

To avoid excessive cross-indexing, the following plan is being followed:

- File <u>marketing information</u> in the appropriate section under the main heading Agricultural Economics.
- File material on <u>buildings</u> and <u>equipment</u> under Agricultural Engineering in the appropriate folders, even though prepared by another department.
- File soil and water reference material.
 relating to engineering under Agricultural
 Engineering. This includes irrigation, drainage, flood control, etc.
- 4. <u>Diseases of livestock</u>, including poultry, are grouped under Livestock Diseases at the end of the Livestock Section—not spread throughout the section.
- 5. Diseases of crops are located at the front of the Crops Section.
- Note that State-wide and Federal <u>Organizations</u> are listed under A-11 but State-wide <u>Services</u> is under D-11.
- Section III-10, <u>safety</u>, includes general safety subjects <u>such</u> as farmstead safety, highway safety, chemical safety, and rural emergency preparedness (civil defense).
- Civil Rights--complete filing system in Sect. II AlO.
- Environment -- included with Natural Resources under the reference file in Sect. III, 9.
- 10. Energy--included under various categories under Reference Sect. III 6, Ag Engineering.

Filing Equipment

Filing Cabinets. Standard, four-drawer, upright, steel filing cabinets that open and close easily are in most common use. One of the cabinets may have a lock for safe-keeping of important materials and records. Consider uniformity in color and size when buying new equipment.

<u>Dividers</u>. Plainly indicate on a card in front the main divisions of your filing system, such as correspondence, administration, reference. If there is more than one main division in a cabinet, indicate the beginning of each with a divider.

Conventional Folders. For sub-divisions of each section, use a left divider (ex. Sect. III 1. Crops, 2. Weeds, etc.). This may be referred to as a major heading.

Folders. Where there are a small number of divisions or specific enterprises, folders with a one-third cut tab to the right may be used.

In case there are many divisions, you may use one-fifth cut tabs that will go from left to right and repeat until completed.

Hanging Folders. Hanging folders, though more expensive, are easier to set up and more flexible in their use. Tabs can be placed on either side of these—wide or narrow widths. The folder itself can be used as a major heading, specific enterprise or an ordinary subject breakdown folder. The tabs can be easily changed and rearranged at any time. Conventional folders may be placed within the hanging folders to hold subject breakdown material.

Main Divisions of the Filing System

I. CORRESPONDENCE

File alphabetically behind guides A-Z.

Normally each letter of the alphabet will have a folder. An exception may be that letters seldom used (X, Y, Z) may be grouped. Use last name of person writing you or person to whom letter is written as key for filing. When correspondence with any one person exceeds 10 letters, make a separate folder labeled with person's name. Place this folder behind the appropriate letter guide.

Letters containing useful reference material may be filed in the subject matter reference section. In these cases, it may be desirable to have such letters duplicated so the correspondence file will be complete. File copies of circular or multiple letters written by agents in the section on documentation in Civil Rights A 10.6-1.

Calf Diphtheria (Necrotic Laryngitis).

4.14-1.2 Reproductive Diseases--Leptospirosis, Vibriosis, Abortion, Infertility, Brucellosis.

4.14-1.3 Toxicity or PoisoningErgot Poisoning, Fescue
Poisoning, Selenium Toxicity, Hydrocyanic
Poisoning, Lead Poisoning,
Poisonous Plants, Sweet
Clover Poisoning, Nitrate
Poisoning.

4.14-1.4 Metabolic Diseases-Ketosis (Acetonemia),
Grass Tetany, Milk Fever,
Urinary Calculi.

4.14-1.5 Digestive Tract Diseases-Calf Scours, Bloat,
Founder, Engorgement,
Rumenitis, Liver Abscesses, Johne's Disease
(Paratuberbulosis),
Coccidiosis, Internal
Parasites.

4.14-1.6 Bacterial or Viral Infections--Anaplasmosis,
Tuberculosis, Anthrax,
Mastitis, Pink Eye, Black
Leg--Malignant edma,
Tetanus, Lumpy Jaw,
Encephalitis, Listeriosis,
Rabies, Navel Ill, Salmonellosis, Foot Rot.

4.14-1.7 External Parasites or Skin Conditions--Photosensitization, Ringworm, Lice, Mange.

4.14-1.8 Nutritional--Rickets 4.14-1.9

4.14-2 Sheep Diseases

4.14-2.1 Respiratory Diseases--Pneumonia, lung worms

4.14-2.3 Toxicity or Poisoning

4.14-2.4 Etabolic Diseases--Pregnancy Disease

4.14-2.5 Digestive Tract Diseases
--Enterotoxemia (over
eating), Internal parasites, Salmonellosis.

4.14-2.6 Bacterial or Viral Infections--Scrapie, Stiff Lamb Disease (Polyarthritis), Foot rot, Listeriosis, Blue tongue, Sore mouth (contagious ecthyma)

4.14-2.7 External Parasites or Skin Conditions--Scabies, External parasites.

4.14-2.8 Nutritional--Urinary Calculi, White Muscle Disease

4.14-2.9

4.14-3 Swine Diseases

4.14-3.1 Respiratory Disease--Atrophic Rhinitis, Influenza, Virus Pig Pneumonia (SPF Pigs), Tuberculosis, Bullnose

4.14-3.2 Reproductive Diseases-Brucellosis, Leptospirosis, Mastitis-MetritisAgalactia (MMA), Reproductive Diseases, SMEDI

4.14-3.3 Toxicity or Poisoning-Gut Edema (Enterotoxemia),
Salt Poisoning (Sodium
Ion Toxicity), Arsenic
Poisoning, Mold

4.14-3.4 Metabolic Diseases

4.14-3.5 Digestive Tract Diseases
--Stomach Ulcers, Scours,
Salmonellosis, TGE,
Bloody Dysentery, Internal Parasites, Prolapse
Rectum, Trichinosis,
Necro

4.14-3.6 Bacterial or Viral Infections--Erysipelas, PPLO
(Mycoplasma), Lock Jaw
(tetanus), Jowl Abscesses,
Hog Cholera, Arthritis,
Tuberculosis, Anthrax,
Aujeszky's Disease
(Pseudorabies), Vesicular
Exanthema

4.14-3.7 External Parasites or Skin Conditions--Greasy Pig Disease, Parakeratosis, Mange, Lice, Pig Pox

4.14-3.8 Nutritional--Baby Pig
Anemia, Bleeding Pig
Disease, V + K, Baby Pig
Disease

4.14-3.9 Miscellaneous--Porcine Stress Syndrome (PSS), Molds, Thumps, Spraddleleg

4.14-4 Poultry Diseases

4.14-4.1 Respiratory Diseases--Laryngotracheitis, Bronchitis, Coryza, Sinusitis, Chronic Respiratory Disease (CRD).

4.14-4.2 Reproductive Diseases 4.14-4.3 Toxicity or Poisoning

4.14-4.4 Metabolic Diseases

4.14-4.5 Digestive Tract Disease--Internal parasites, Coccidiosis

4.14-4.6 Bacterial or Viral Infections--Fowl cholera, Salmonellosis, Pullorum, Typhoid, Bluecomb, Tuberculosis, Leukosis complex, Marek's Disease, Fowl Pox, Newcastle Disease, Mycotic Diseases (Molds).

4.14-4.7 External Parasites or Skin Conditions--External parasites.

4.14-4.8 Nutritional

4.14-4.9 Miscellaneous--Hemorrhagic Syndrome
