A Message From the President

Dear Friends:

For 13 sessions I have been involved as President in our University Summer School Program, and during that time I have observed improvement in our delivery of summer term education to students. These improvements have been possible due to a number of changes that include:

1. Shifting responsibility for Summer School directly to the Office of the Vice President for Academic Affairs, thereby assuring that the summer term would carry academic importance similar to that given the fall and spring semesters.
2. Balancing summer term offerings and managing section size to assure students that their summer school needs will be met with appropriate enrollment opportunities and instructional resources.
3. Expanding our summer school offerings, particularly in selected communities throughout the state, so that students are guaranteed not only classes, but an organized sequential series of offerings that lead towards an undergraduate or graduate degree.
4. Making sure that our support services to students are sufficient so they can master their summer term expectations.

As I retire, I particularly want to thank the students who have enrolled in our summer term and help contribute to their academic excellence. I also want to thank the faculty and staff who support our summer school offerings, especially Vice President for Academic Affairs Carol J. Peterson and Edward Hogan, Assistant Vice President. Summer term is an important contribution to continuing education opportunities at South Dakota State University.

Cordially,

Robert T. Wagner

President
