## The Early Years

On February 21, 1881, the Territorial Legislature passed an act "to locate and establish...a college in Brookings on condition that a tract of land of not less than 80 acres...be secured and donated to the territory of Dakota."

Residents pitched in and raised slightly more than \$600, enough to purchase the land on which part of the University is located.

In 1883, the Legislature appropriated \$20,000 to "build a college" here. In the Fall of 1884, seventeen regular students and 61 preparatory students enrolled.

One of the students was Marcus Saylor of Swan Lake, Dakota Territory. He had earned credit at other colleges before coming here and was therefore able to graduate in late June of 1886, the first person to receive a degree from this university. Saylor later became a medical doctor.

There were no graduates in 1887. On August 9, 1888, three persons graduated, Lula Wellman, J.M. Aldrich and Aubrey Lawrence. The ceremony lasted the entire forenoon. Each graduate delivered an oration. This tradition is continued today with brief comments by representative members of the Senior Class.

## The Second Century, A Commitment for the Future

Commencement is a time for reflection. We consider the past as the foundation for the future, and we ponder over the nature of that future. As part of that reflection, various faculties and support areas of the University have prepared statements of commitment in the academic area for the next century. Brief excerpts from these statements follow as a philosophical expression of the academic soul of the university.

### The Academic Senate

"...the University must provide an education that fosters profound appreciation of human dignity and social justice and preserves both individual and social diversities.

"Education at South Dakota State University in this second century must prepare students to develop novel technologies and discover new scientific principles that improve life for all. Because the complexity and rapid pace of the technical world can encroach upon human experience and security, we need a perspective which combines the varied insights of artist, novelist, scientist, theorist, and professional. Appreciation of the arts and sciences is essential to a deeper understanding of human aspirations and needs."

### The Division of Student Affairs

"...commits itself to support the educational purposes of the University by providing effective information and administrative services, by furnishing quality health, housing, food and Union accommodations, and by stimulating and supporting the student's academic personal and social development through various out-of-class programs."

### The Graduate School

"The Graduate School is committed to providing an atmosphere for qualified students to obtain rigorous advanced education in a variety of fields in preparation for service and leadership in their professions and society. It also promotes scholarly pursuits and scientific research for the advancement of knowledge within a climate of freedom of inquiry."

### The College of Agriculture and Biological Sciences

"It is the goal of the College to design its curriculum, its research and its extension programs in the next century to insure:

1. further economic development in South Dakota,
2. wise use and conservation of our natural resources,
3. improved energetic efficiencies in meeting peoples' food needs, and
4. improved quality of rural life that helps to contribute to the personal satisfaction of our state's citizens."

## **The College of Arts and Science**

"The College understands and accepts as one of its goals to balance career development and expertise with human sensibilities, thereby encouraging the current emphasis on the liberal arts—natural sciences, social sciences, humanities, and fine arts—through the University core requirements as well as by student participation in lifetime activities, e.g., physical education, theatre, music, visual arts, dance, foreign language skills, etc."

## **The Division of Education**

"We envision our society, by necessity, changing its values and beginning to assign teaching and education the priority that is going to be required if we are to begin to solve the problems dominating us today.

"Schools, elementary through graduate, must play a major role in meeting this great challenge. And, knowing that schools are never any better than the individuals who teach in and administer them, we are cognizant of the responsibilities facing the Division of Education at South Dakota State University."

## **The College of Engineering**

"The College aspires to transmit an attitude that difficult problems are really great challenges, that one must dream and think, that by using materials and natural laws engineers create what never was. Simply stated, our goal is to educate people who are technically competent and who are able to deal effectively with their fellow human beings."

## **The College of General Registration**

"The College is committed to help students make objective academic and career decisions based on improved understanding of their abilities, interests, academic offerings and career opportunities. Academic planning programs, classes and various materials will be developed to enable students to more fully realize their academic and career potentials."

## **The College of Home Economics**

"The College is committed to (1) the ideal home life for today unhampered by traditions of the past, (2) the utilization of all the resources of modern science to improve the home life, (3) the freedom of the home from the dominance of things and their due subordination to ideals, and (4) the simplicity in material surroundings which will most free the spirit for the more important and permanent interests of the home and of society. The College goal is to prepare professionals both as generalists and specialists to help families and business in the areas of food shelter, clothing, human relationships and education, and is committed to excellence in these programs."

## **The College of Nursing**

"The College accepts the broad goal of improving health care and the overall quality of life through the education of health care professionals, through provision of expertise and consultative service to the health care system, and through research."

## **The College of Pharmacy**

". . . commits itself in the next century to provide a firm foundation in the basic principles of pharmacy, to foster high standards of ethical conduct and responsibility, and to develop an understanding of human needs that will enable graduates to deal empathetically with those they serve."

# RUTH W. REDHEAD

## DISTINGUISHED PROFESSOR OF FOREIGN LANGUAGES

The designation of "Distinguished Professor" is a most selective one. Dr. Ruth W. Redhead is the second to be so honored at South Dakota State University. Guidelines for nomination and selection required approval by the Board of Regents. Upon recommendation of a faculty committee and the administration of South Dakota State University, the Board of Regents has authorized awarding of this high honor to Dr. Redhead.

Dr. Redhead has Bachelor of Education and Master of Arts degrees from the University of Vermont and the Doctor of Philosophy degree from the University of Minnesota. She came to South Dakota State University as Instructor in 1962 and was promoted from Instructor to Full Professor between 1962 and 1976. She has taught courses in French at all levels from introductory language courses to more advanced literature, composition, and conversation courses. Her seminars motivate and share ideas with high school teachers. During the summer of 1989 (the Bicentennial of the French Revolution), she will take students to France for her ninth summer program of living and study in that country.

Over the years, Dr. Redhead has found time to do research and has published three papers on French Seventeenth Century Literature and has also written a book, *Images of Conflict*. In mid-1970, Dr. Redhead received the "Palme Académique" Award with the title "LeChevalier," the highest academic award presented to a foreigner by the French government. She has also received Outstanding Educator of America recognition; was twice selected as College of Arts and Science "Teacher of the Year"; and in 1988 received this University's F.O. Butler Award for Excellence in Service to Students. She is a member of the Graduate Faculty at South Dakota State University. She has been elected to membership in Phi Kappa Phi and Pi Gamma Mu honor societies.

Dr. Redhead is a member of seven professional organizations and has served as treasurer of the South Dakota Chapter of the American Association of Teachers of French. She has received grants to study in France and in Quebec and, in 1988, organized the French and Indian Heritage Conference supported by a South Dakota Committee on the Humanities grant.

Dr. Redhead is held in high esteem by peers and by students. She "lives French" and instills this enthusiasm in her students in and out of the classroom. Whether she is planning or teaching a class, introducing her students to French cuisine, conducting a study tour of France, preparing an article for publication, directing a meeting, or helping to plan the European Studies program, her enthusiasm is evident. She loves her work and becomes totally absorbed in it. The quality of participation at every level and the intellectual stimulation and cultural revitalization that result reflect honor on South Dakota State University and the State of South Dakota.

In recognition of her many scholarly contributions to the academic community and to the citizens of South Dakota, and of the high respect of her students and her colleagues, we are proud to award the title, "Distinguished Professor of Foreign Languages."

# BURLINGTON NORTHERN AWARDS

South Dakota State University is the recipient of a second \$13,500 Burlington Northern Foundation Faculty Achievement Award. This allows the University to provide three \$1,500 awards each year for unusually significant and meritorious achievement in teaching or unusually significant and meritorious achievement in professional scholarship. This year, the award committee has recognized the following:

1. *For Excellence in Teaching*

ROBERT V. BURNS, Professor of Political Science  
WILLIAM S. WADSWORTH, JR., Professor of Chemistry

2. *For Significant Scholarship*

ALI A. SELIM, Professor of Civil Engineering

## SEWREY FACULTY COLLOQUIUM 1989

The Charles L. Sewrey Faculty Colloquium was initiated in 1983 by the Academic Senate and provides an annual opportunity for SDSU faculty members to participate in an interdisciplinary event. Colloquia are intended to stimulate discussion of academic ideals and their relation to classroom and laboratory experiences. The following faculty members were selected for the honor of Sewrey Faculty Colloquium 1989 Speakers.

SYDNEY AYOTTE: "*A Year in India*"

LINDA BAER: "*A Centennial Salute: People and Places in Small Towns of South Dakota*"

DELORES KLUCKMAN: "*Education—Life or Death*"

DOUGLAS MALO: "*Assessment: A Tool for Program Improvement*"

JOHN PARSONS: "*The Little Butter Maker, A Commemorative Lecture Celebrating the Life of Shirley Seas*" (David Fee Memorial Lecture)

JAN VANDEVER: "*Equity of the Mathematical Kind*"

CHARLES WOODARD: "*Native and Other Americans*"

## STUDENT ORGANIZATION AWARDS

In 1985, the South Dakota Board of Regents initiated Student Organization Awards in order to recognize meritorious efforts and achievements of student groups. The following SDSU student organizations have received these Board of Regents Student Organization Awards in 1989:

*Award for Student Development:*

1st Place: Kappa Epsilon—SDSU

3rd Place: Sigma Alpha Epsilon—SDSU

*Award for Organizational Leadership:*

2nd Place: Farm House Fraternity—SDSU

3rd Place: Academy of Students of Pharmacy—SDSU

# THE ACADEMIC PROCESSIONAL

The academic procession which officially precludes the graduation ceremonies on college and university campuses is one of the old and colorful customs which link 20th century education with its early origins.

To signalize the achievements of their students, American institutions of higher learning conduct a formal ceremony to award the appropriate degrees earned at the conclusion of prescribed study. The action of taking the degree—associate, bachelor's, master's or doctor's—as well as the designation of the day itself—is Commencement.

Various explanations of the term Commencement are possible. The most likely is that centuries ago the bachelor, originally an apprentice, began his apprenticeship upon that day; and with the degree of M.A. and Ph.D.—the masters and the doctors commenced their work upon the day their degrees were conferred. So today, the student, having finished his/her preliminary training, sets out upon the career for which he/she has prepared.

The academic regalia worn at commencement is of medieval origin. The scholars of Bologna, Salamanca, Paris, Oxford, Cambridge, Louvain and Heidelberg dressed in a manner to distinguish themselves from the merchants and other townsmen. Since the 11th century, when the rise of the universities began, "learned clerks" robed themselves in gowns, caps and hoods, thus marking a difference between "town and gown."

By this apparel they were recognized as belonging to the teaching guild which was the Guild of the Master of Arts. In this organization the bachelor was the apprentice of the master. This relationship was the forerunner of today's academic structure; which often includes graduate and/or teaching assistants (usually studying for advanced degrees).

In our time customs vary as to the wearing of academic gowns. In the older English universities the masters or dons continue to wear such garments which engaged in instructional duties; students are required to wear gowns while attending lectures or during tutorials. Ordinarily in Germany, Spain, Austria, and some other European universities, academic regalia is worn only on certain stipulated occasions as in America today.

Generally in Europe, a professor wears the type of garment customary in the university where he/she is lecturing. In the United States our tradition differs; our professors continue to wear the gown and hood of the university where they received their highest degree.

The gown, in origin, may have been simply a type of overcoat to protect the teacher from the cold in the unheated buildings; the cut or style seems to be derived from ecclesiastical attire. It has usually been black. The gowns of bachelors and masters are usually without trimmings of any sort whereas those of doctors are faced down the front with velvet and adorned with three velvet bars on the sleeves.

The cap or "mortarboard" may have come from the squarish cap worn by the masons of the Middle Ages, or perhaps was suggested by the shape of the books which occupied so much of the time of the scholar. Attached to a button on the "mortarboard" is a tassel; bachelor's and master's are black or color appropriate to the subject; those of doctors black or golden. The tassel is worn on the left side by those who are receiving or have received a degree.

The hood, a triangular fold of cloth worn over the back of the gown, is faced with colors which denote the field of study represented by the wearer's degree; the colors of the lining are those of the college or university from which the degree was granted. The length of the hood is correspondingly longer with each higher degree.

The wide velvet borders extending down the front of the doctoral gown, the velvet bar on the sleeves, and the borders of most hoods are colored according to the scholarly field of the wearer. The most usual of these are:

|                                  |   |
|----------------------------------|---|
| White . . . . . Arts and Letters | Light Blue . . . . . Education          |
| Copper . . . . . Economics       | Blue . . . . . Philosophy               |
| Orange . . . . . Engineering     | Sage Green . . . . . Physical Education |
| Brown . . . . . Fine Arts        | Gold . . . . . Science                  |
| Lemon . . . . . Library Science  | Scarlet . . . . . Theology              |

At South Dakota State University the color of the tassel signifies the college in which the degree is earned:

|                                      |                                 |
|--------------------------------------|---------------------------------|
| Agriculture . . . . . Maize          | Home Economics . . . . . Maroon |
| Arts and Science, B.A. . . . . White | Nursing . . . . . Apricot       |
| B.S. . . . . Gold                    | Pharmacy . . . . . Green        |
| Engineering . . . . . Orange         |                                 |
