Abstract

Artificial collection composed of articles and publications written by South Dakota State University faculty.

Contents Note

The Faculty Publications is an ongoing collection of articles and publications written by South Dakota State University faculty. This material has been collected in a haphazard manner. There has never been a policy to collect anything smaller than books written by faculty authors, so the assumption here is that these articles, were, for the most part, donated to the archives. There is not a program to collect such material. Currently, if material arrives in the archives, it is added to the collection.

It is recommended that researchers ask staff about materials by specific faculty members.

Conditions Governing Access

This collection is open to researchers without restrictions. The materials in the Archives do not circulate and may be used in-house only.

Researchers conducting extensive research are asked to make an advance appointment to access archival material. Please call or e-mail prior to visiting the collection and indicate as much detail as possible about a particular topic and intended use.

South Dakota State University supports access to the materials, published and unpublished, in its collections. Nonetheless, access to some items may be restricted as a result of their fragile condition or by contractual agreements with donors.

Copyright note

Copyright restrictions apply in different ways to different materials. Many of the documents and other historical materials in the Archives are in the public domain and may be reproduced and used in any way. There are other materials in the Archive carrying a copyright interest and must be used according to the provisions of Title 17 of the U.S. Code. The Archive issues a warning concerning copyright restrictions to every researcher who requests copies of documents.

Although the copyright law is under constant redefinition in the courts, it is ultimately the responsibility of the researcher to properly use copyrighted material.
