Harvest Restrictions for Soybean Herbicides

by Leon Wrage, Extension Agronomist - Weeds
and Darrell Deneke, Extension IPM Coordinator

Weather conditions have prompted inquiries about forage use or grazing of treated fields. If early-season conditions indicate that the crop may be used for forage, consider the following restrictions when selecting herbicides. Some herbicides are lacking residue data, and, therefore, are not approved for haying or grazing.

<i>Grain and Forage Restrictions for Soybean Herbicides</i>			
	<i>Restrictions/ Harvest Interval (Days)</i>	<i>Application Interval (Days) Forage/Grazing Allowed (Y/N)</i>
